

# ROLL-TON 725 XL

## VIBRATING PEDESTRIAN ROLLER

FOR EXTRA POWER AND EASY OPERATION

### Features and benefits

- Extra light weight balanced aluminium control arm making light work of any job.
- Extra electrical toggle switch controls for easy operator effort and greater operational control.
- Bigger water tank capacity made from non-corroding plastic for less durability and avoids downtime from clogging with rust, extending tank life.
- Extra special drum face camber with varying angle leaving no drum track impressions on hot mix finishes.
- Extra motor power giving greater output to drive the hydraulic gearbox and extends the life of the motor with less maintenance.
- Extra automatic chain and belt tensioners for even less maintenance.

### Roll-ton 725 XL- Specifications

#### Frame

Fabricated from mild steel, primed and finish painted with enamel.

#### Control Arm

Fabricated from lightweight aluminium for minimal operator effort.

#### Motor

Honda GX200 petrol 4-stroke, producing 6.5 HP at 3,600 RPM with a 12V DC charge coil.

#### Drive
